

new product

Onguard MKIII is reaching its **final stage of production.**

Features: In addition to all the normal Onguard features, we have added:

1. RFID points
2. Multiple Routes with multiple times
3. Built in lithium battery
4. LCD readout
5. Stay Awake
6. Time and attendance

In the pipeline are the following optional features

1. Fingerprint Time and Attendance
2. Two way voice communication with supervisors
3. Full Web based rostering system. (This will be provided FREE to Onguard customers)

Just one click...
from your monitoring interface

Simply plug into existing LAN
(Local Area Network)
or connect wirelessly to local WIFI.

Vehicular access control...

Identiscan will properly identify the vehicle by scanning the vehicle licence disk and displaying the vehicle information on a screen at your control point.

Guards will be audibly and visually alerted to suspicious vehicles.

Pre-authorisation done off site on the internet.

Simply plug into existing LAN (Local Area Network running DHCP) **or connect wirelessly to local WIFI.**

Keep you guards alert with our STAYAWAKE
Configure the system easily from our website.

STAYAWAKE offers these features:

- Back up battery.
- Call Supervisor function (SMS or email)
- Variable Shift start and end times. (set via web interface)
- Variable timer delay (set via web interface)

Issue your guards with ID cards.

Onguard now allows you to store all your guards information on our secure servers.

We provide you with an Android Phone App to upload your staff photo with no fuss.

Only one click and we print the ID card for you.

Introductory offer as an Onguard Rental client, you qualify for

3 FREE ID CARDS per Onguard rented from us.

Your Staff information works hand in hand with the time and attendance system already in place on all Onguard Systems!
